

Wellbeing Impact Study of HS2 (WISH2)

Date: <today's date>

Participant Information Sheet

Document ID: WISH2-WP2-W1-D1

Principal Investigators: Dr Katherine Morley & Prof Stephen Morris

IRAS ID: 302856

Organisations: RAND Europe & The University of Cambridge

Human Research Ethics Reference: 22/EE/0292

We are inviting patients from your GP practice to participate in the Wellbeing Impact Study of High-Speed 2 (WISH2). This letter has been sent by your GP practice using a secure mailing service. Your contact details **have not been shared** with the research team. They will only be shared if you agree to be involved in the WISH2 research.

**What is the Wellbeing Impact Study of HS2 (WISH2)?**

- WISH2 is an independent research project run by researchers.
- It has been set up because the UK parliament wants to know what people think about the High-Speed 2 (HS2) train line and how it affects people's mental health and wellbeing.
- **This includes understanding how the cancellation of the HS2 Phase 2 route has affected people.**

We are comparing the experiences of people who live near the HS2 Phase 2 routes (including areas where it is no longer going ahead as planned) and people who live far away from the route. This means **we are interested in your mental health and wellbeing even if you do not live near HS2.**

There is more information on the project website www.wish2.org.

**What do I need to do?**

- **Read this information sheet and complete a consent form**
- **Complete a survey** about your health and wellbeing, your community, and your views on HS2

You can do this:

- **Online** using the details in the box below
- **By post** using the paper forms and return envelope included with this letter
- **By telephone** by contacting the research team on the number below

To complete the consent form and survey online, go to this website:

[link here]

You will need to enter your logon code:

[logon code here]

**How can I contact you?**

If you have any questions or want to do a telephone survey, contact Dr Katherine Morley (email: wish2@randeurope.org or telephone: 01223 353329).

Our thanks for your contribution

To recognise the time you give to this research, you will have the option to either:

1. Enter a prize draw for a £50 Select voucher (www.select-your-reward.co.uk/)
2. Choose a charity to receive a donation on your behalf (this will add up to a significant donation when combined with donations from other participants).

Who is doing this research?

This research is being done by the Cambridge Centre for Health Services Research, a collaboration between RAND Europe (a not-for-profit research institute) and the University of Cambridge: www.cchsr.phpc.cam.ac.uk/.

How is WISH2 being funded?

This study is funded by the Department for Transport and High-Speed Two Ltd, supported by the National Institute for Health Research. These organisations will not try to influence the findings, **which will inform future Phases of HS2 as well as future infrastructure projects**. Our website has more information about how we make sure our research is independent: <https://wish2.org/>.

Do I have to take part in this research?

You do not have to take part. Your personal information has not been shared with us. It will only be shared if you agree to be involved in the WISH2 research.

If you do agree to be involved in WISH2 but later change your mind you can withdraw from the study without giving a reason, but we will keep information about you that we already have. To do this contact Dr Katherine Morley (email: wish2@randeurope.org or telephone: 01223 353329).

What does being part of this study involve?

If you agree to be involved in this study, we will ask you to:

1. **Complete a survey** about your health and wellbeing, your local community, and how you think HS2 might affect these things.
2. **Let us securely use your NHS number** so your GP and NHS Digital (the organisation that stores national healthcare data) can share information about your use of psychological therapy services, anti-depressant medication prescriptions, and diagnosis of anxiety or depression with the research team.
3. **Let us contact you** for 2 follow-up surveys and to let you know about findings from the research you have contributed to. After the first survey, we will contact you 2 more times over the next 10 years.

How will you use information about me?

We will use information from you and from your medical records for this research project. This information will include:

- Your name and initials
- Your contact details
- Your date of birth
- Your NHS number

People will use this information to do the research or to check your records to make sure that the research is being done properly.

People who do not need to know who you are will not be able to see your name or contact details. Your data will have a code number instead. We will keep all information about you safe and secure.

Once we have finished the study we will keep some of the data so we can check the results. We will write our reports in a way that means no-one can work out that you took part in the study.

What are my choices about how my information is used?

- You can stop being part of the study at any time, without giving a reason, but we will keep information about you that we already have.
- If you choose to stop taking part in the study, we would like to continue collecting information about your health from central NHS records and your GP. If you do not want this to happen, tell us and we will stop.
- We need to manage your records in specific ways for the research to be reliable. This means that we won't be able to let you see or change the data we hold about you.

Who will have access to my information?

The table below shows the information we will collect, how it will be used, and who can use it. We will **not** share your name, date of birth, NHS number or contact details with the Department for Transport, High-Speed Two Ltd, or anyone else outside the research team apart from NHS Digital. NHS Digital will only use this information to find your medical records.

Type of information	What it will be used for	Who will have access
Name, email address, phone numbers, postal address, and NHS number	To contact you about this study. This will include telling you about findings from the research, and letting you know about follow-up surveys.	1) WISH2 research team 2) NHS Digital data linkage staff 3) DocMail (secure mail service)
De-identified survey data	To understand the impact of HS2 on mental health and wellbeing, when combined with data from other participants.	1) WISH2 research team 2) Approved secure data entry staff (paper surveys only) 3) Researchers approved by the UK Data Service
De-identified data from your GP medical record and NHS Digital	To understand the impact of HS2 on anxiety and depression, and use of psychological services, when combined with data from other participants.	1) WISH2 research team

How long will you keep my information, and what will you do with it at the end of the study?

We will store your name, contact details, date of birth and NHS number, and information from your medical records for 12 months after the project is finished. This is so we can finish publishing the study results and contact you to let you know about them. After this, we will destroy the information.

The UK Data Service (see the next page) will indefinitely store “de-identified” information from the surveys for research use only. When information is “de-identified” it is stored under a code and **not** linked to your name or contact details.

What is the UK Data Service?

Because this research is funded by the government, we must make the new information we collect available to others at the end of the study. This makes sure that other researchers can make the most use of this information.

We will share the survey information (but **not** your personal information or medical records) using the UK Data Service (<https://ukdataservice.ac.uk/>). This is a secure service that makes data sets available to registered users. The UK government fund it through UK Research and Innovation. The University of Essex and the University of Manchester manage it.

We will use 'safeguarded' UK Data Service sharing. This means only people registered and approved by the UK Data Service will have access to information from this study, and we will know who has been given access and for what reason.

How do you keep my information secure?

All digital information will be stored on a secure server in Cambridge UK. It will only be accessible to the research team at RAND Europe, and the University of Cambridge. Backups will be taken in case of a disaster. They will be encrypted and stored at a secure offline site within the UK. All records will be kept in compliance with the UK General Data Protection Regulation (GDPR) 2018.

RAND Europe will securely store all paper consent forms and surveys. De-identified survey booklets will be shared with an approved, secure data entry company who will enter responses into a secure digital database.

RAND Europe uses an Information Security Management System to store data safely and securely. RAND Europe and the University of Cambridge both have ISO 27001 certification, an international standard for information security. More information about RAND Europe's privacy policy is available here:

<https://www.rand.org/randeuropa/privacy.html> and about the University of Cambridge at <https://www.medschl.cam.ac.uk/research/privacy-notice-how-we-use-your-research-data/>.

The WISH2 privacy statement is available here: <https://wish2.org/privacy-policy>.

Where can I find out more about how my information is used?

You can find out more about how we use your information:

- At www.hra.nhs.uk/information-about-patients
- The Human Research Authority's leaflet available from www.hra.nhs.uk/patientdataandresearch
- By emailing the research team at wish2@randeuropa.org.
- By emailing our Data Protection Officer at REdpo@randeuropa.org
- By ringing us on 01223 353329.

For **independent advice about data protection or to make a complaint** you can contact the Information Commissioner's Office by visiting www.ico.org.uk, emailing casework@ico.org.uk, or writing to Information Commissioner's Office, Wycliffe House, Water Lane, Wilmslow, Cheshire, SK9 5AF, UK
